Life in Motion

DESIGN BALLENDAT

oyo®
The Chair

oyo gets you rocking everywhere.

oyo is new, daring and unique. It attracts attention and it is immediately obvious that this chair is a statement and an all-rounder which moves gracefully between retro and modern, and that it has what it takes to be a design classic: **oyo** – The Chair.

This new chair from **aeris** not only looks good, it is of course also highly functional, technologically advanced and ergonomic. The **oyo** is the world's first combination of a saddle seat, shell chair and rocking chair. A completely new way of sitting which invites you to move more and assume all sorts of different sitting positions.

The **oyo** is not only stylish, but also variable. In the conference room, meeting area or at home – the **oyo** adds style and motion through its timeless and dynamic design.

oyo is love at first sit. Its flowing shape embraces you with a growing feeling of wellbeing as you sit. And the best part: the **oyo** always rocks you into a good mood.
